- Maximum Extension: 24.75"
- Cable management
- Pan/Swivel Range: 180°
- Tilt Range: -5° /+ 15°

The new generation of Mustang ARTICULATING ARM mounts brings together Mustangs traditional class of strong, sturdy, secure characteristics with a sleek, modern design. A matte black powder-coat finish will match perfectly with the typical flat panel LCD, PLASMA and LED displays that are popular today. A new slim wall plate allows for low profile positioning when the ARM is retracted and the new one-touch tilt mechanism makes it simple and easy to adjust the tilt settings up to 15 degrees.

Universal, VESA compatible display brackets allow for ease-of-installation and ensure that wide range of displays are covered—saving the installer the need to call and order special parts to complete an installation.
