

MR-PRESENTATION 100' RF Based Wireless Presentation Remote

MUSTANG™

This 3-in-1 omni-direction wireless presenter combines the features of a presentation device, wireless mouse and laser pointer in one, intuitive, hand-held device. Control your presentation from anywhere in the room, with just one touch. The excellent 2.4GHz RF technologies enable a user to control the presentation from up to 100' away indoors. The MR-Presentation1 requires no additional software, and provides a presenter with the freedom to step away from the computer and use the entire room—without pointing the remote at the receiver. Plug-and-play USB technology makes setup in any environment effortless. With its sleek, ergonomic design, the MR-Presentation1 is both a practical and aesthetic addition to any presentation.

MR-PRESENTATION1

Mustang's MR-Presentation1 wireless presentation controller is a remote, a mouse and a laser pointer. Designed to make presentations easy, the MR-Presentation1 allows you to switch between slides and use the laser from anywhere in the room. Its compact size — 5" long, 1.5" wide and .5" thick — fits in the palm of a hand. It's simple to use, just plug the USB receiver into the computer or projector's USB port and start using. The presentation controller will work within 100' (328' outdoors) of the USB receiver. No additional software is needed.

MR-PRESENTATION1
